

# Noted & Recommended.

**while breast cancer might be one of life's consequences, trust is one of life's options.**

No one really knows if they will face breast cancer. They, their mother, wife, sister, relatives, even their father. But, it happens. And the pain is real on all levels.

To do something about it, you have to trust someone like Dr. Edward "Ned" Dalton, of the Elliot Breast Health Center. Recognized as the "Top Doc" in the region to personally handle breast cancer screening, diagnosis, and treatment, Dr. Dalton and his staff will meet with you, offer education, act with compassion and provide conclusive care.

With his heart, through his trusted hands, and by his words of comfort... thousands of women have dealt with the initial trauma, the on-going realities, and the ultimate recovery from breast cancer.

The Elliot Breast Health Center has also pioneered technologies and processes as diverse as Interventional Breast MRI, EnBloc biopsy, genetic testing and soft-mammograms to name a few. With cancer prevention as their goal, their treatment options provide an equal share of peace of mind.

Dr. Dalton and the entire staff at the Elliot Breast Health Center are dedicated to the thought of helping you "Live Better". That's why they're an option that is noted and recommended.

 **The Elliot.**  
*Live Better!*
